Skills

Ruby on Rails - Express - Node.js - Heroku - Handlebars - CSS - JavaScript - jQuery - Salesforce - Bootstrap - HTML - SAAS - Mongoose - Mongodb - Amazon Web Services - PostgreSQL - Express.js - Ember.js - Phaser - Unity

Experience

General Assembly / Web Developer
AUG 2016 - NOV 2016, BOSTON, MA

- Completed a 12-week immersive (~500 hours) web dev course.
- Opportunity Fund Fellow granted a full-scholarship.
- Developed 4 full-stack and front-end applications:

Microwave Wars

A game based on my classmate's struggle to reach the microwave at lunch. This game has a custom Ruby on Rails API on the back-end. I taught myself the Phaser HTML5 game framework in a week to complete it as part of my capstone project's front-end. Also used: TexturePacker, Tiled, Photoshop.

User Stories Wizard

Single-page app. Tool for busy (and lazy) developers to build their user stories. In the back-end: custom Ruby on Rails API. Front end: JavaScript, Bootstrap, Handlebars, Postgres.

Death Bucket (Group Project)

This is a bucket list app built along with three developers. It is a custom Express.js and MongoDB application.

Prince of Persia Tic-tac-toe

As a first project, this is my take on a classic game. Uses JS, jQuery, AJAX.

MIT - Office of the President / Administrative Assistant II
JUN 2015 - AUG 2016, CAMBRIDGE, MA

- Content Manager of the MIT President's website, and social media support for the several channels on presidential matters.
- Provided the President with various press reports.

The Vilcek Foundation / Executive Assistant
OCT 2011 - MAY 2015, NEW YORK, NY

- Promoted from Administrative Intern.
- Social Media Manager and stakeholder engagement role.

Courses and Certifications
